EPA is committed to working closely with response agencies and state and local officials to ensure the safety of citizens, respond to concerns and to evaluate impact to water contaminated by the Gold King Mine Release. EPA is sharing information as quickly as possible with the public as experts work to evaluate any effects the spill may have on drinking water, public health, agriculture, fish and wildlife. Please see our website for the latest information: <http://www2.epa.gov/goldkingmine>
Regular updates will be posted as they are available.

Comments: Is the water in Lake Powell being monitored due to the mine spill and is it safe? Will the lake be closed (or portions of it be closed (other than the San Juan river arm) and is there a danger in swimming, showering or washing dishes in it? Is there an area of the lake that could be considered "safe" (i.e., mile markers below the San Juan or above the San Juan river arm?) We were planning a houseboat trip 8/17 - 8/23 and need to understand if it should be cancelled. Thank you! P.S. If we go on the lake how can we monitor this situation... is there a radio channel that will issue reports/warnings?
